

SAKITHTHIYAN THANKAVELU

+94 770167675 sakiththiyant@gmail.com sakiththiyan-t saki06

PROFILE

Motivated Data Science undergraduate with hands-on experience in data processing, backend development, and automation workflows. Skilled in Python, Pandas, and SQL fundamentals, with a strong interest in data engineering, ETL pipelines, and scalable data systems. Passionate about transforming raw data into meaningful insights and building efficient data-driven solutions.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)
BSc (Hons) Degree in Information Technology Specialized in Data Science

Jun 2022 – Present
CGPA: 3.13/4.00

EXPERIENCE

AI & Data Science Intern
Techorin Solution Pvt Ltd

June 2025 – Dec 2025
Sri Lanka

- Researched and implemented AI solutions using Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG) to improve information retrieval and automated response generation.
- Developed the Payment Schedule Management module for the CPD Property Management System to manage installment tracking.
- Built the Kamro AI document question-answering system that extracts text and images from PDFs for multimodal information retrieval.
- Created an HR automation workflow using n8n to fetch CVs from Gmail, extract candidate details, and automatically rank applicants for recruitment screening.

TECHNICAL SKILLS

Programming	Python, JavaScript, Java, C++
Data Engineering	ETL Pipelines, Data Transformation, Data Processing
Databases	MySQL, MongoDB, SQL
Developer Tools	Git, GitHub, Postman, VS Code
Data Processing	Pandas, NumPy
Web & APIs	Flask, REST APIs, HTML, CSS
Cloud Platforms	AWS (Basic), Microsoft Azure

PROJECTS

Stroke Prediction Model (Individual)
Sep 2024

- Developed a predictive model to estimate stroke risk using clinical and demographic features. Applied machine learning algorithms for healthcare data analysis and risk classification.
- Technologies: Python

Movie Recommendation System (Individual)
Sep 2024

- Implemented a movie recommendation engine using collaborative filtering, content-based filtering, and hybrid approaches.
- Enhanced recommendation accuracy based on user preferences and watch history.
- Technologies: Python

Data Analysis Dashboard in Power BI (Individual)

🕒 Jan 2025

- Created an interactive Power BI dashboard using CSV data to analyze Amazon Prime content. Visualized key insights including show distribution by rating, genre popularity, and movie vs. TV show ratios.
- **Technologies:** Power BI

Generative AI Medical Chatbot (Individual)

🕒 Jan 2025

- Built an AI-driven medical chatbot using LangChain, Pinecone, Flask, and Sentence-Transformers to semantically search *The Gale Encyclopedia of Medicine* and provide real-time, context-aware answers.
- Optimized embedding models, semantic retrieval logic, and backend deployment for responsiveness and accuracy.
- **Technologies:** Python, Flask, LangChain, Pinecone, Sentence-Transformers, PyPDF

Sai Photography Studio Management System (Group)

Mar 2024 – May 2024

- Developed a web-based system for client bookings, event scheduling, and portfolio showcase using the MERN stack.
- My Contribution: Implemented customer booking features, user profile management, and feedback/rating modules.
- **Technologies:** MERN Stack

Data Warehousing and BI System (Individual)

May 2025

- Designed and implemented a complete data warehouse using SQL Server and SSIS, featuring star and snowflake schemas, slowly changing dimensions, accumulating fact tables, and advanced ETL pipelines from CSV, Excel, and SQL sources.
- Built SSAS cubes with hierarchies and measures; demonstrated OLAP operations (Roll-up, Drill-down, Slice, Dice, Pivot) in Excel; and developed interactive Power BI reports including matrix views, cascading slicers, drill-down, and drill-through capabilities.
- **Technologies:** SQL Server, SSIS, SSAS, Power BI, Excel

SkillNest – Skill-Sharing Social Platform

🕒 Mar 2025 – May 2025

- Built a full-stack social platform enabling users to share skills, follow others, comment, and chat in real time with notifications via Firebase/WebSockets. Led user management, including profile updates, progress tracking, activity-based recommendations, and secure OAuth 2.0 login with role-based access.
- **Technologies:** React.js, Spring Boot, MongoDB, WebSockets, OAuth 2.0

CERTIFICATIONS

Data Analytics Essentials – 

Cisco

AI/ML Engineer - Stage 1 – 

SLIIT

Machine Learning – 

Coursera
